Experience

Senior Software Engineer
February 2021 - Present

Software Engineer at Envoy, responsible for building new product features, enhancing user experience, and maintaining codebases across multiple products and engineering teams. Key contributions include developing and enhancing a GraphQL API aggregation system, now powering a mobile app with over 100,000 users. Actively engages in the engineering recruitment team, conducting technical screenings and on-site interviews. Serves in the on-call rotation team to ensure system reliability and effective incident triaging. Promoted to Senior Software Engineer in February 2021, leading the design and implementation of key engineering solutions such as centralizing email operations and developing critical system components. Drives experiments that significantly impact annual recurring revenue (ARR) and mentors team members to enhance team synergy.

Software Engineer
April 2018 - February 2021
Envoy - San Francisco, CA

Ruby on Rails Architect
October 2016 - April 2018
Crossover - Austin, TX

Collaborated with Crossover's clients to address critical issues impeding their ability to expand their client base. Contributed to the implementation of new features, analyzed and suggested architectural changes to enhance business value, and worked on resolving performance issues.

Ruby on Rails Contractor
June 2016 - March 2017
ChimiChurri Inc - Austin, TX

As a Ruby on Rails developer, assisted in adding new features and fixing bugs in the core platform used for generating flavor-based applications. Authored shell scripts to enhance application deployment on Docker and maintained specifications. Also migrated Rails-based views to a CMS to provide customers with increased flexibility.

Ruby on Rails Developer
June 2015 - March 2016
SLG - Austin, TX

Migrated the main front-end application from a .NET-based API to a full-stack web application using Ruby on Rails and PostgreSQL. Established the continuous integration environment utilizing GitHub, Codeship, and Heroku. Implemented new features and user authentication capabilities, improved unit and integration tests with RSpec, and resolved various issues. Significantly enhanced performance, coached new developers, and refined the main calculations component for better efficiency.

Skills

Programming Languages

Ruby Javascript SQL
C/C++ C# Shell
Java Kotlin

Frameworks & Libraries

Ruby on Rails Sinatra Hanami
GraphQL ReactJS NextJS
NodeJS Devise Sidekiq
Tailwind

Platforms

AWS Heroku Fly.io
DigitalOcean Docker
Github Cloudflare Stripe
SendGrid Brevo

Databases

PostgreSQL MySQL Redis
Pinecone Elasticsearch

Tools, testing & more

Postman ArgoCD Cypress RSpec Dokku Puma Unicorn Datadog Bugsnag SAML JSONAPI OpenAI LangChainRB
